Si necesita asistencia en Español por favor comunicarse con Laura Ramos a el correo electrónico lramos@csufresno.edu o numero de teléfono 559-278-2066.

How CSUSB Students Apply for USDA Watershed Management Internships (For CSUSB Students Only)

1. Students should review the **Eligibility Requirements** and download the **Application** form for *2011 Watershed Management Experiential Learning for USDA Careers* program found on both of the following websites:

[Water Resources Institute \(WRI\) http://wri.csusb.edu/](http://wri.csusb.edu/)

[Water Resources and Policy Initiatives \(WRPI\) http://www.calstate.edu/water/](http://www.calstate.edu/water/)

2. Students should also review the **USDA Career Track Requirements** that describe how students selected for internships must complete mandatory process learning about USDA career opportunities that align with the degree being sought and identify any requisites necessary to apply for those USDA jobs upon graduation.
3. Any student with initial questions about the program (after reviewing the documents listed above) should contact [Program Manager Julie Lappin](#) at (909) 537-3687.
4. Students should examine the WRI and WRPI websites (listed above) for any internships being sought by USDA agencies in the vicinity of their home campus. Students qualified to apply for these internships are encouraged to submit an Application.
5. Students are encouraged to contact USDA agencies in the vicinity of their home campus listed below to inquire about any potential internships opportunities that may be available.

[California District Offices of the Natural Resource Conservation Service \(NRCS\),](#)
[Pacific West Area Offices of the Agricultural Research Service \(ARS\),](#)
[California National Forest Service Recreation Areas \(NFS\)](#)

6. Students are also encouraged to contact the Chair of the Department in which they are majoring to inquire whether faculty members may be engaged in watershed-related research projects that a student researcher could assist with. If an internal research project is available, the student should identify which faculty advisor would supervise the watershed-related research project and submit an Application. Note: WRI staff are not able to serve as advisors on the internships.
7. Students are also encouraged to schedule an appointment with the research staff at the Water Resources Institute (WRI) in PL-401 which is located in the Pfau Library on the 4th floor to discuss internal internships that a student researcher could assist with. Research staff includes WRI [Program Manager Julie Lappin](#) at (909) 537-3687, WRI Water Historian/Archivist [Suzie Earp](#) at (909) 537-7683, or WRI Director of Programs [Boykin Witherspoon](#) at (909) 537-3685.
8. Students submitting an application are **required to submit a 500-word confidential personal biography** that describes their career plans and provides information about their family of origin to determine underrepresented status.
9. **Completing the Internship Application Form:** Fill out all parts of the form; don't leave anything blank. Send the digital Draft Application for initial review to [Program Manager Julie Lappin](#).
10. Students also need to download, review, and submit the **Intern Informed Consent for Data Collection** document, provided students are willing to consent. Signing this permits the lead CSU agency to collect academic data and intern performance data required for USDA reporting purposes. This is optional for the students. Send this document when you submit the application form and personal biography.
11. Students should submit their **unofficial** transcripts with their application.
12. Draft Applications will be returned with comments within 7 days. Revisions may be necessary before an Application is accepted, and Track Changes will be used to make suggestions and required changes within the Word document.
13. Once an Application is complete and is officially accepted by the WRI, students can send either a PDF of the pages requiring signatures (with your name and application signatures in the file name), or FAX the signed pages to Julie Lappin at (909) 537-7682.
14. Determination of whether application is awarded or denied will be emailed to the student and supervisor with further information about setting up your Watershed Management Internship.
15. Students have a **maximum of 1 year to complete the internship**.
